EMERGING PATTERNS & REUSABLE BLOCKS

ℹ ℹ This section tracks form-specific patterns that appear across multiple forms but are not yet standard blocks. Document them here so they can be identified, reused, and eventually standardised if they appear in 3+ forms.

☑ Institution / Third-Party Verifier Block [NEW PATTERN — 1st occurrence]

Use this block when a form is submitted by a third-party verifier (institution, employer, attorney) rather than the applicant directly. This block captures the verifying organisation's details and the authorised signatory.

NOTES & EDGE CASES

Note 1: SUBMISSION TIMING: The paper form states it "MUST be submitted and dated following the start of the school term." The digital service should enforce this with a validation check: if the current date is before the school term start date entered, block submission and display an error.

Note 2: OFFICIAL STAMP: The paper form includes a physical stamp box. The digital equivalent should either accept an uploaded image of the stamp OR require a statutory declaration checkbox. Consider whether a digital submission alone (from an authenticated institution account) may be sufficient to replace the stamp requirement — this is a policy decision for NIS.

Note 3: STUDENT AGE RANGE: The form explicitly states it is only for students aged 16–25. The digital service must validate this against the Date of Birth entered and display a clear error if the student falls outside this range.

Note 4: INSTITUTION AUTHENTICATION: This form requires a registration/authentication mechanism for educational institutions. NIS should consider a verified institution portal or a one-time access code system so submissions can be trusted.

Note 5: FOR OFFICIAL USE FIELDS: National Insurance No. and National Registration No. in the "For Official Use ONLY" header are NIS-completed fields. These should appear in an admin/officer view only, pre-populated from the student's existing NIS record, and not be editable by the institution.
