National Insurance and Social Security (NIS) — Barbados

Contributions Payment Certificate — Self-employed Persons

Form Specification | Service Pattern Analysis

★ FORM TYPE: Self-employed Annual Contributions Certificate. This is the self-employed equivalent of the D.P. 10 (employer monthly contributions certificate), but with critical structural differences: (1) it is annual rather than monthly; (2) it covers multiple years in a single submission via a looping Year → Contributions Payable grid; (3) it is addressed to and submitted TO the CEO of NIS — not from an employer to employees. It is the most minimal form in this series, with only 7 distinct input fields, yet carries significant financial and legal weight.

Form Metadata

Attribute	Detail
Form Name	Contributions Payment Certificate — Self-employed Persons
Form Code	Not specified on form
MDA	National Insurance and Social Security (NIS) — BarbadosAddressed to: Chief Executive Officer, National Insurance Office, Culloden Road, St. Michael, Barbados, West Indies
Purpose	Declares and pays annual NIS contributions for a self-employed person. Covers one or more contribution years in a single submission, with a total amount payable. Functions as both a payment declaration and a remittance advice to NIS.
Completed By	Self-employed individual — self-service
Payment Deadline	Contributions for the current year are payable by January 15th of the following year. Late payments incur 5% interest per year. E.g., contributions for 2024 must be paid by January 15th, 2025.
Complexity	Easy
Estimated Time	~5 minutes
Total Fields	7 distinct input fields: Self-employed NIS Number, Self-employed Name, Year(s) [looping], Contributions Payable [looping], Total Amount Payable, Signature, Date
Flow Type	Single-page paper certificate — to be digitised as a Single Page or minimal 2-Step Wizard with auto-calculated totals
Cross-form Link	Pairs with NIS Self-Employment Registration Form (first form in this series) — NIS Number and Name should be pre-populated if person is already registered
Date Analyzed	March 16, 2026
Analyzed By	GovTech Barbados Service Design team
Last reviewed	March 23, 2026

ℹ This is the most minimal form in the series — just 7 input fields — yet it involves real financial payment. The digital service must auto-calculate contributions based on the self-employed person's NIS registration record, pre-populate the Year(s) and Contributions Payable rows from NIS data where possible, and integrate with a payment gateway. The form's simplicity is deceptive: the calculation of contributions payable is governed by NIS rate schedules and earnings declarations made separately.

Positioning within the NIS Form Series

Related Form	Relationship to This Certificate
NIS Self-Employment Registration Form (Form 1 in series)	Pre-requisite: the self-employed person must first register with NIS. Their NIS Number and Name on this certificate should be pre-populated from registration records.
D.P. 10 — Employer Contributions Certificate (Form 4 in series)	Structural sibling: D.P. 10 is the employer's monthly equivalent. Key differences: D.P. 10 is monthly, has an earnings type grid, and includes employee counts. This form is annual, individual, and has only Year + Contributions Payable rows.
NIS Online Social Security Service Registration (Form 8 in series)	Digital portal onboarding: a self-employed person who has registered for the NIS online portal could submit this certificate digitally, with NIS Number and Name pre-populated from their portal account.

Service Pattern Pages: Applicability Check

The following pages from the Build-Ready Service Pattern Template apply to this form:

☑ 1. Start Page — REQUIRED (absent from paper form; very brief for this simple certificate)
☑ 2. Eligibility Page — Minimal: must have an active NIS self-employment registration number
☑ 3. Applicant Details Page — Minimal ✓ (Self-employed NIS Number + Name only — no address, contact, or extended ID blocks needed)
☐ 4. Criteria & Entitlement Page — Not applicable
☑ 5. Contributions Entry Page — REQUIRED ✓ (Year + Contributions Payable looping grid — 2nd occurrence of Contribution Period Selector; new Minimal Contributions Grid pattern)
☐ 6. Evidence Upload Page — Not applicable
☑ 7. Check Your Answers Page — REQUIRED (especially important given payment integration)
☑ 8. Payment & Submit Page — Payment Required version ✓ (contributions due; EZ Pay or bank integration; Signature + Date declaration)
☑ 9. Confirmation & Next Steps Page — REQUIRED (receipt of payment; late interest warning if applicable)

⚠ This form is unusually minimal for a payment submission — only 7 fields. However, the calculated contributions payable amounts should ideally come from NIS's internal records (based on the self-employed person's declared earnings), not be manually entered by the applicant. If the digital service can pre-populate contributions from NIS data, this becomes effectively a 3-field review-and-pay form: NIS Number → confirm year(s) → pay total.

PAGE 1 — START PAGE (To Be Created for Digital Service)

Element	Recommended Content
Form Title (H1)	Pay Your Annual NIS Contributions as a Self-employed Person
Last Updated	Last updated on March 23rd, 2026
Service Description	Use this service to declare and pay your annual National Insurance contributions as a self-employed person. You must be registered with NIS as a self-employed person in Barbados before submitting this certificate.
Payment Deadline Notice	Contributions for the current year must be paid by January 15th of the following year. Contributions paid after this date are considered late for previous years and will incur interest of 5% per year. Example: Contributions for the 2024 year must be paid by January 15th, 2025.
Complete in One Go	You should complete this certificate in one go. At the moment, it is not possible to save your answers and come back to them later.
How long does it take?	It shouldn't take longer than 5 minutes.
What you will need	• Your self-employed NIS Number• The contribution year(s) you are paying for• The contributions payable amount for each year (from your NIS contribution schedule or as assessed by NIS)• Your payment details (EZ Pay or bank)
What happens after?	NIS will record your contribution payment. A receipt confirming your payment will be issued. If you are paying late, interest at 5% per year will be applied to the outstanding amount.
Start Button	"Start now" — green primary button

PAGE 2 — SELF-EMPLOYED PERSON IDENTITY (Paper Form: Header Fields — Minimal Applicant Details)

ℹ Unlike every other form in this series, this certificate does not collect a full applicant details set. It captures only two identity fields: the Self-employed NIS Number and the Self-employed Name. No address, no NRN, no contact details — the NIS Number is treated as the sole identifier. This reflects the assumption that the submitter is already registered in NIS's system.

Block A — Self-employed Identity Block ☑ Applies (Minimal — NIS Number + Name only)

Field Name	Component	Label / Help Text	Required	Validation / Notes
Self-employed NIS Number	Text Input (ID)	Label: "Self-employed NIS Number" Note: Paper form shows segmented boxes indicating a fixed-length numeric format — identical visual treatment to the National Insurance Number field used across all other forms in this seriesHelp: "Your NIS number as a self-employed person. Find this on your NIS self-employment registration	Yes	Numeric; verify exact length with NISShould validate against NIS self-employment registry in real timeIf NIS Number is found: auto-populate Name fieldIf not found: show error 'This NIS number is

Field Name	Component	Label / Help Text	Required	Validation / Notes
		certificate."Digital enhancement: if the person is logged into the NIS online portal, this field should be pre-populated automatically from their account.		not registered as a self-employed person. Please register first.'
Self-employed Name	Text Input (auto-populated or manual)	Label: "Self-employed Name"Note: Paper form has a free-text name field to the right of the NIS NumberHelp: "Your full name as registered with NIS. This will be auto-populated when you enter your NIS Number."Digital enhancement: auto-populate from NIS registry on NIS Number entry; allow manual confirmation if not found.	Yes	Max 200 charsShould match NIS registry record if NIS Number validatesLabel on paper mirrors 'Name in full (Last Name, First Name, Middle Name)' convention used across the series — digital should display full registered name

⚠ This is the most minimal identity block in the entire series. Unlike all previous forms, there is no NRN, no address, no contact details. The NIS Number is the sole identifier. The digital service must validate the NIS Number against the NIS self-employed persons registry and auto-populate the name — manual entry of the name should be a fallback only.

PAGE 3 — CONTRIBUTIONS ENTRY (Paper Form: Year / Contributions Payable Grid — New Minimal Contributions Grid)

🚩 NEW PATTERN: Minimal Annual Contributions Grid. Unlike the D.P. 10 Earnings & Contributions Grid (which has 5 columns per row: Earnings Type, No. of Employees, Insurable Earnings, Rate, Contributions Payable), this grid has only 2 columns: Year and Contributions Payable. It is the self-employed, annual equivalent. The contributions payable amount is not calculated from earnings inputs on this form — it is either pre-assessed by NIS or declared by the person based on their earnings. The grid supports up to 2 visible rows on the paper form (implying multi-year back-payment capability) plus a Total row.

Purpose: Declares the contribution year(s) being paid and the contributions payable for each year. Supports payment for multiple years in a single submission (e.g., catching up on arrears).

Block B — Annual Contributions Grid ☑ Applies (Looping — 1 to N years)

Column / Field	Component	Label / Help Text	Required	Validation / Calculation Notes
Contribution Year	Dropdown or Number Input	Label: "Year" Help: "The contribution year for which you are paying. E.g., enter '2024' for the 2024 contribution year."Note: Paper form shows 2 data rows — implying multi-year	Yes (per row)	4-digit year Must not be a future year Warn if year is more than [X] years in the past (may trigger interest) Suggest:

Column / Field	Component	Label / Help Text	Required	Validation / Calculation Notes
		capability. Digital should support dynamic row addition.Digital enhancement: pre-populate from NIS records showing outstanding contribution years for this NIS Number.		dropdown pre-populated with outstanding years from NIS registry
Contributions Payable	Currency Input or Calculated Field	Label: "Contributions Payable" Help: "The NIS contributions amount due for this year. This should match your NIS contribution assessment."Note: Paper form leaves this as a manually entered currency field. Digital ideal: pre-populate from NIS internal assessment. Manual entry only if NIS cannot calculate.Format: BBD dollars and cents.	Yes (per row)	Currency BBD; 2 decimal places; positiveIdeally read-only / pre-calculated from NIS assessmentIf manual: must be consistent with NIS rate × declared earnings for that year
Total Amount Payable	Calculated Field (read-only)	Label: "Total Amount Payable"Note: Paper form has 'Total Amount Payable' as the last row of the grid — auto-calculated sum of all Contributions Payable rows.Display prominently as the payment amount due.	Auto	Sum of all Contributions Payable rowsDisplay in BBD currency, 2 decimal placesRead-only; live-updated as rows are added or edited

Grid Control	Behaviour
Add Year Row	Button: '+ Add another year' — adds a blank row for an additional contribution yearMaximum: [e.g., 10 years — confirm with NIS]
Remove Year Row	'× Remove' on each row except the firstRecalculates Total Amount Payable on removal
Total Row	Auto-calculated read-only TOTAL row at bottom of gridTotal Amount Payable = sum of all Contributions Payable values
Pre-population	If NIS Number validates: offer 'Load outstanding years from NIS records' button to pre-populate rows with years and amounts owedThis is the recommended digital enhancement — reduces manual entry and errors
Late Interest Display	For each year where the payment deadline has passed, display a calculated interest amount: Contributions Payable × 5% × years overdueShow an updated 'Total including interest' line below the Total Amount Payable

⚠ The paper form shows only 2 data rows, but the label 'Total Amount Payable' as a grid row (not below the grid) implies the form was designed for multi-year back-payment. The digital service should make this explicit: clearly label each row as a separate year and allow the self-employed person to pay for multiple outstanding years in one transaction.

PAGE 4 — CHECK YOUR ANSWERS (To Be Created — Pre-Payment Review)

Purpose: Shows the self-employed person a clear summary of what they are about to pay before committing to the transaction.

Sections to display on Check Your Answers:

- Self-employed Identity (NIS Number, Full Name)
- Contribution Years and Amounts (each year with contributions payable — table format)
- Late Interest (if applicable — prominently flagged per year)
- Total Amount Payable (displayed prominently in large text before payment)

⚠ This is a payment-gated form — the Check Your Answers page is the last opportunity for the person to verify the total before money changes hands. The Total Amount Payable must be displayed very prominently — ideally as a dedicated highlighted total box with the BBD amount in large text.

PAGE 5 — PAYMENT & SUBMIT (Payment Required — Declaration + Payment Gateway)

Element	Detail
Payment Required?	Yes — NIS contributions are payable as part of this submission
Total Amount Due	Displayed prominently from the contributions grid totalIf late: also show interest-inclusive total
Payment Method	EZ Pay integration (recommended)Alternatively: bank transfer / cheque with NIS account details displayedNote: The paper form is addressed to the CEO of NIS — it was historically submitted with a cheque or bank transfer. The digital service should replace this with an integrated payment gateway.
Late Interest Warning	If any contribution year is overdue: 'Late payment interest of 5% per year applies to the following years: [list]. Your total including interest is $[amount].'This should appear before the payment button — not after.
Declaration Statement	No explicit declaration text appears on the paper form beyond the Signed/Date fields. Recommended digital declaration: 'I declare that the contribution years and amounts stated in this certificate are true and correct, and that I am submitting payment in full for the years listed.'
Legal Notice	No legal warning appears on the paper form. Recommend adding the consistent series-wide warning: 'Any person who knowingly makes a false statement for the purpose of obtaining benefit or reducing contributions commits a criminal offence punishable by a fine or imprisonment or both.'
Signature	Digital Signature Pad (canvas-based) with Clear buttonLabelled: 'Signed' — consistent with paper form
Date	Auto-filled with submission date (read-only)Note: Paper form has a 'Date' field — the digital service should auto-populate this
Submit & Pay Button	"Submit Certificate and Pay" — triggers payment gatewayAmount: Total Amount Payable (including any applicable late interest)

PAGE 6 — CONFIRMATION & NEXT STEPS (To Be Created for Digital Service)

Element	Recommended Content
Success Message	"Your NIS Contributions Payment Certificate for [Year(s)] has been successfully submitted and payment of $[amount] BBD has been received."
Reference Number	SECP-[YEAR]-XXXXXXXX (e.g., SECP-2026-00001234)
Payment Receipt	"Download Payment Receipt (PDF)" — buttonReceipt should include: NIS Number, Name, Contribution Year(s), Amount Paid per Year, Total Paid, Date, Reference Number
Late Interest Applied	If interest was charged: 'Late payment interest of $[amount] was included in your payment for the following year(s): [list].'
Next Contribution Year	'Your next annual contribution payment for [upcoming year] is due by January 15th, [following year].' — proactive deadline reminder
NIS Records Update	"Your NIS contribution record has been updated. You can view your updated contribution history by logging in to the NIS Online Social Security Service."
Contact Information	NIS — National Insurance and Social SecurityChief Executive Officer, National Insurance OfficeCulloden Road, St. Michael, Barbados, West Indies(246) 431-7400 | customer.service@bginis.gov.bb

CONDITIONAL LOGIC

Condition (IF)	Action (THEN)	Where
IF Self-employed NIS Number is not found in NIS registry	THEN show error: 'This NIS number is not registered as a self-employed person. Please register with NIS before submitting this certificate.'Link to: Self-Employment Registration Form	Page 2
IF Self-employed NIS Number validates	THEN auto-populate: Self-employed Name from NIS registryAND offer: 'Load outstanding contribution years from your NIS record'	Page 2
IF contribution year payment deadline has passed (after January 15th of following year)	THEN show late payment warning per year: 'Year [X] is overdue. Interest of 5% per year will apply.'AND calculate and display: interest amount per year and updated total	Page 3
IF Total Amount Payable = 0	THEN show notice: 'Your total payable is $0.00. If you believe this is incorrect, contact NIS before submitting.'	Page 3/4
IF more than one contribution year row is added	THEN recalculate Total Amount Payable after each row addition or edit	Page 3
IF payment gateway transaction fails	THEN show error: 'Payment could not be processed. Your certificate	Page 5

Condition (IF)	Action (THEN)	Where
	has been saved but not submitted. Please try again or contact NIS.'Do NOT record the certificate as submitted until payment is confirmed	

COMPARISON WITH D.P. 10 EMPLOYER CONTRIBUTIONS CERTIFICATE (Structural Sibling)

The D.P. 10 (Form 4 in this series) and this Self-employed Contributions Certificate are structural siblings — both are NIS contribution declarations with a looping grid and a payment obligation. The table below documents the key differences to inform the shared design system.

Design Dimension	D.P. 10 — Employer Certificate	Self-employed Certificate
Submitted by	Employer (or authorised agent)	Self-employed individual
Frequency	Monthly — one per contribution month	Annual — one per contribution year (multi-year catch-up supported)
Grid columns	5: Earnings Type, No. of Employees, Insurable Earnings, Rate (%), Contributions Payable	2: Year, Contributions Payable
Grid rows	Up to 6+ earnings types per month	Up to N years (typically 1–2 on paper form)
Contributions calculated from	Insurable Earnings × Rate — calculated on form	Pre-assessed by NIS or declared separately; amount entered directly
Discrepancy adjustment	Yes — overpayment / shortpayment carry-forward block	No — not present
Payment deadline	15th of the following month	January 15th of the following year
Late penalty	1% per month or $20.00, whichever greater	5% per year
Identity fields	Employer Reg. No. + Business Name + Address	NIS Number + Name only (no address)
Signatory	Employer / authorised signatory — name, role, signature	Self-employed person — signature + date only
Addressed to	NIS (submitted as contribution declaration)	CEO of National Insurance Office (formal remittance letter)
Payment method	EZ Pay / bank	Historically: cheque/bank transfer to CEO; digital: payment gateway

EMERGING PATTERNS & REUSABLE BLOCKS | Cumulative Series Status

Pattern 1 — Barbados Address Block [STANDARD BLOCK — confirmed, N/A to this form]

☑ **This form is the first in the series that does NOT use the Barbados Address Block — confirming it is a contextual block (used when address collection is required) rather than universal. Its 7-occurrence record across other forms remains intact.**

Pattern 2 — Minimal Annual Contributions Grid [New — 1st occurrence]

A 2-column looping grid (Year + Contributions Payable) with a Total row. The self-employed, annual, individual equivalent of the D.P. 10 5-column employer grid. Key differences: no earnings type categorisation, no employee count, no rate field — contributions are pre-assessed or self-declared as a single annual amount per year. The digital service should pre-populate from NIS records where possible.

Column	Component	Calculated?	Notes
Year	Dropdown / Number Input	No — user input (or pre-populated)	4-digit year; outstanding years from NIS registry
Contributions Payable	Currency Input / Read-only	Ideally pre-calculated from NIS	BBD; 2 decimal places; positive
Total Amount Payable	Currency — Calculated	Yes — sum of all rows	Auto-updated; displayed prominently for payment

Pattern 3 — Annual Contribution Deadline + Late Interest Block [New — 1st occurrence as annual variant]

Unlike the D.P. 10's monthly deadline (15th of following month, 1%/month penalty), this form uses an annual deadline (January 15th of the following year, 5%/year penalty). The digital service must calculate and display late interest per year and per total submission. This annual deadline + interest pattern is likely to recur on any NIS or BRA annual tax/contribution filing form.

Pattern 4 — Minimal Identity Block (NIS Number + Name only) [New — 1st occurrence]

This is the most minimal identity block in the series — only NIS Number and Name, with no NRN, address, or contact details. It relies entirely on NIS's registry for verification. Appropriate for forms where the submitter is already registered in the system and the NIS Number provides sufficient identity verification. Should be distinguished from the full Personal Details Block and documented as a Registered Identity Shorthand Block for use on contribution payment forms.

Pattern 5 — NIS Registry Auto-Population [New — 1st explicit occurrence]

On NIS Number entry, the digital service should: (1) validate the number against the NIS self-employed persons registry, (2) auto-populate the Name field, and (3) offer to pre-populate outstanding contribution years and amounts. This auto-population pattern is implicitly needed on several previous forms (e.g., D.P. 10 employer lookup) but is most explicit here given the minimal form structure. Should be formalised as a standard digital enhancement for all NIS forms with an NIS Number field.

Pattern 6 — Formal Remittance Letter Format [New — 1st occurrence]

Unlike all other forms in this series, the Contributions Payment Certificate is addressed to and formatted as a formal letter to the CEO of NIS. It includes the NIS office address as a recipient header. This is not a form submission workflow — it is a remittance advice / payment letter. The digital equivalent should generate a formal PDF certificate (not just a confirmation page) that the self-employed person can retain as proof of payment. The letter-format structure should inform the Confirmation page PDF template.

DECLARATION BLOCK

Field Name	Component	Label / Help Text	Required	Validation
Declaration Statement	Static Text	Recommended: 'I declare that the contribution years and amounts stated in this certificate are true and correct, and that I am submitting payment in full for the years listed.'Note: No declaration text appears on the paper form — the signature and date lines stand alone. A formal declaration should be added for the digital service.	—	—
Late Interest Consent	Checkbox (conditional)	Label: '☐ I acknowledge that late payment interest of $[amount] has been applied to my total'Conditional: shown only if any year is overdue	Conditional	Must be checked if late interest applies
Signature	Digital Signature Pad	Label: "Signed"With: 'Clear Signature' button — consistent with paper form label 'Signed'	Yes	Must not be empty
Date	Date (auto)	Label: "Date"Auto-filled with submission date — consistent with paper form	Auto	Read-only
Submit & Pay Button	Button (Primary)	"Submit Certificate and Pay $[Total Amount Payable]"	—	—

FORM COMPLEXITY ASSESSMENT

Complexity Signal	Present?
Single submitter (no looping party blocks)	☑ Yes — single self-employed individual
Looping data entry block	☑ Yes — Year / Contributions Payable grid (1 to N years)
Conditional logic	☑ Yes — 6 rules (NIS Number validation, auto-population, late interest, zero total, payment failure, multi-year recalculation)
Payment integration	☑ Yes — contributions payment required; total auto-calculated from grid
Auto-calculated fields	☑ Yes — Total Amount Payable; late interest amounts

Complexity Signal	Present?
Late payment interest calculation	☑ Yes — 5% per year on overdue amounts; must be calculated and displayed per year
Cross-form linkage (Self-Employment Registration)	☑ Yes — NIS Number should validate against self-employment registration; Name pre-populated
NIS registry pre-population opportunity	☑ Yes — outstanding years and amounts can be pre-loaded from NIS records
Formal letter / remittance format	☑ Yes — addressed to CEO of NIS; PDF receipt required
File uploads required	☐ No
Multi-party completion	☐ No — individual self-service only

Overall Complexity: EASY (on paper — 7 fields). MEDIUM (in digital service — NIS Number validation, registry lookup, multi-year grid, auto-calculated totals, late interest calculation, and payment gateway integration). The form's simplicity is deceptive: the digital service must do significant calculation and registry work behind a minimal UI.

Notes & Edge Cases

1. This is the most minimal form in the series by field count (7 fields) but arguably the most technically demanding to digitise correctly — it requires real-time NIS registry lookup, contribution rate retrieval, late interest calculation, and payment gateway integration.

2. The paper form has no declaration text — just 'Signed' and 'Date' lines. The digital service should add a formal declaration consistent with the series pattern, making the submission legally sound as a self-certification.

3. The paper form shows 2 data rows plus a Total row, implying multi-year catch-up capability. There is no explicit instruction for how many years can be covered in one submission. NIS should confirm the maximum number of years that can be caught up in a single certificate and whether there is a maximum arrears period.

4. The 5% per year late interest rule is stated clearly on the form. The digital service must calculate this accurately per year of arrears. For example, if paying for 2022, 2023, and 2024 in 2026, each year's interest period differs — 2022 carries more interest than 2024. The calculation logic should be confirmed with NIS and implemented with full transparency to the submitter.

5. The form is addressed to the 'Chief Executive Officer, National Insurance Office' — a formal remittance letter format. The digital service should generate a formal PDF certificate (not just a transactional confirmation) that replicates this letter format and can be used by the self-employed person as official proof of contribution payment for tax, benefit claim, or audit purposes.

6. This form pairs directly with the NIS Self-Employment Registration Form (Form 1 in this series). A self-employed person who has just registered should be prompted to submit their first Contributions Payment Certificate. The digital service should create a clear journey from registration to first payment.
